Company history

Peter Nürk, a business information technologist, founds ORCON GmbH in 1992.

„DV Organisation und Beratung“, in Englisch „**OR**ganization and **CON**sulting“ - short **ORCON**.

He is convinced of the idea of offering standard software that is individually configurable. Adaptations are not simply packed into a program, rather the variable data from tables and databases are specifically incorporated.

This significantly reduces the ever more complex and time-consuming adjustments required for updates. In addition, individual customer wishes can be easily implemented and made available to other customers as added value.

This is one of the secrets that makes **Phoenix/PDM** so popular with users.

Today, **Phoenix/PDM** from **ORCON** is one of the few independent and established software solutions from Germany, which ensure the reliable administration and distribution of product information in companies.

Peter Nürk
CEO

ORCON...

- ... meets you at eye level.
- ... is a team of energetic and highly motivated employees.
- ... knows its customers - personally.
- ... supports with professional competence.
- ... inspires in the market with many years of experience.
- ... offers modular products of the highest quality and user-friendliness.
- ... responds to requirements in order to enable suitable solutions.
- ... shows you how simple brilliant solutions can be.
- ... makes your company more productive.

Table of contents

Phoenix/VIEW	4
At a glance	5

Visualization and printing of neutral formats, raster data as well as native CAD formats via plugins, eDrawings, 3D-PDF, PVZ, etc.

The visualization of documents and models is one of the strengths of **Phoenix/PDM**. On the one hand **Phoenix/PDM** has an integrated visualization and on the other hand **Phoenix/VIEW** is delivered free of charge with every Phoenix/PDM-Client Floating-License.

Phoenix/PDM supports the user visually at every point in the program where this makes sense.

The visualization is intelligently solved, whereby the necessary viewers such as Adobe Reader, Autodesk Design Review, SolidWorks eDrawings, PTC Creo View, Microsoft XPS Viewer, Lattice XVL Player etc. are fully automatically embedded in **Phoenix/PDM**. The functionalities of the embedded viewers are retained and can be used, for example, for measuring or a section display.

Furthermore, **Phoenix/VIEW** itself is able to visualize and print all common raster formats such as TIFF, PNG, JPEG etc. directly.

Worldwide access to your data or paperless production is possible with our Phoenix/eMotion.

Phoenix/VIEW at a glance

- Visualization fully integrated in **Phoenix/PDM**.
- Visual support wherever it makes sense.
- Printing, displaying and, if necessary, measuring independent of CAD software.
- Automatic plug-in recognition and use.
- Any external viewer can be configured.
- Raster data are visualized directly.
- Worldwide access or paperless production possible with **Phoenix/eMotion**.

Phoenix/PDM

Your software for product data management.

Phoenix/PDM is your tool for managing project data, CAD models and drawings. It offers all departments in the company easy and flexible access to their virtual data.

Phoenix
2D-CAD

Interfaces to 2D-CAD software.

Complete integration of the interfaces into the user interfaces of the CAD systems Autodesk Inventor, PTC Creo Parametric, PTC Creo Elements/Direct Modeling and SolidWorks.

Phoenix
3D-CAD

Interfaces to 3D-CAD Software.

Complete integration of the interfaces into the user interfaces of the CAD systems Autodesk Inventor, PTC Creo Parametric, PTC Creo Elements/Direct Modeling and SolidWorks.

Phoenix
VIEW

Simple presentation of your documents.

Visualization and printing of neutral formats, raster data as well as naive CAD formats via plugins, eDrawings, 3D-PDF, PVZ, etc.

Phoenix
RCS

Automated workstation.

Automated, unattended update of native CAD formats to current versions and creation of neutral formats.

Phoenix
ERP

Interfaces to ERP systems.

Phoenix/PDM creates the bridge between CAD, PDM and ERP. We thus offer the appropriate interfaces for an automatic exchange of data between PDM and the ERP system.

Phoenix
BOM

Intelligent bill of materials management.

Simple and uncomplicated administration and creation of construction parts lists, optional connection to the ERP system.

Phoenix
OFFICE

Interface to Microsoft Office.

Complete integration into the user interfaces of Microsoft Office, as well as continuous integration into the **Workflow**.

Phoenix
OUTLOOK

Interface to Microsoft Outlook.

Complete integration into the user interface of Microsoft Outlook, as well as continuous integration into the **Workflow**.

Phoenix
SPOOL

Integrated print and plot management.

Print entire project folders or sets of drawings at the touch of a button, scaled to a desired target format, with a stamp if necessary.

Phoenix
MOBILE

Mobile access to your data.

Make better decisions with secure and fast mobile access to critical business data anytime, anywhere in the world.

Phoenix
DFS

Synchronize data from distributed locations.

Automatic configurable synchronization of your file archives between all locations. This gives you secure access to your data at any location.

The right product data management for your success.
