

## Go through all the practical steps.

## Company history

Peter Nürk, a business information technologist, founds ORCON GmbH in 1992.

„DV Organisation und Beratung“, in Englisch „**OR**ganization and **CON**sulting“ - short **ORCON**.

He is convinced of the idea of offering standard software that is individually configurable. Adaptations are not simply packed into a program, rather the variable data from tables and databases are specifically incorporated.

This significantly reduces the ever more complex and time-consuming adjustments required for updates. In addition, individual customer wishes can be easily implemented and made available to other customers as added value.

This is one of the secrets that makes **Phoenix/PDM** so popular with users.

Today, **Phoenix/PDM** from **ORCON** is one of the few independent and established software solutions from Germany, which ensure the reliable administration and distribution of product information in companies.

Peter Nürk  
CEO

## ORCON...

- ... meets you at eye level.
- ... is a team of energetic and highly motivated employees.
- ... knows its customers - personally.
- ... supports with professional competence.
- ... inspires in the market with many years of experience.
- ... offers modular products of the highest quality and user-friendliness.
- ... responds to requirements in order to enable suitable solutions.
- ... shows you how simple brilliant solutions can be.
- ... makes your company more productive.

## Go through all the practical steps from planning to completion.

We offer individual training courses for your employees and your company for proven and practical approaches as well as possible solutions around **Phoenix/PDM**. You will learn how to control and manage your data management with even greater efficiency.

## Learning objectives

In our trainings you will ideally go through the complete project process - from planning to completion. By learning practice-oriented techniques, you will know the basics for smooth data management.

You will learn how to drive your planned project forward and how to control and manage it unerringly.

## Dates and places

Our trainings are individually adapted for our customers and applications.

These can take place in our Training and Competence Center in Kirchentellinsfurt (Germany) or at your premises.

For further information please send us an e-mail to [info@orcon.de](mailto:info@orcon.de) or call us at +49 7121 51492 - 0.

Phoenix/PDM

**Your software for product data management.**

**Phoenix/PDM** is your tool for managing project data, CAD models and drawings. It offers all departments in the company easy and flexible access to their virtual data.

Phoenix  
2D-CAD

**Interfaces to 2D-CAD software.**

Complete integration of the interfaces into the user interfaces of the CAD systems Autodesk Inventor, PTC Creo Parametric, PTC Creo Elements/Direct Modeling and SolidWorks.

Phoenix  
3D-CAD

**Interfaces to 3D-CAD Software.**

Complete integration of the interfaces into the user interfaces of the CAD systems Autodesk Inventor, PTC Creo Parametric, PTC Creo Elements/Direct Modeling and SolidWorks.

Phoenix  
VIEW

**Simple presentation of your documents.**

Visualization and printing of neutral formats, raster data as well as naive CAD formats via plugins, eDrawings, 3D-PDF, PVZ, etc.

Phoenix  
RCS

**Automated workstation.**

Automated, unattended update of native CAD formats to current versions and creation of neutral formats.

Phoenix  
ERP

**Interfaces to ERP systems.**

**Phoenix/PDM** creates the bridge between CAD, PDM and ERP. We thus offer the appropriate interfaces for an automatic exchange of data between PDM and the ERP system.

Phoenix  
BOM

**Intelligent bill of materials management.**

Simple and uncomplicated administration and creation of construction parts lists, optional connection to the ERP system.

Phoenix  
OFFICE

**Interface to Microsoft Office.**

Complete integration into the user interfaces of Microsoft Office, as well as continuous integration into the **Workflow**.

Phoenix  
OUTLOOK

**Interface to Microsoft Outlook.**

Complete integration into the user interface of Microsoft Outlook, as well as continuous integration into the **Workflow**.

Phoenix  
SPOOL

**Integrated print and plot management.**

Print entire project folders or sets of drawings at the touch of a button, scaled to a desired target format, with a stamp if necessary.

Phoenix  
MOBILE

**Mobile access to your data.**

Make better decisions with secure and fast mobile access to critical business data anytime, anywhere in the world.

Phoenix  
DFS

**Synchronize data from distributed locations.**

Automatic configurable synchronization of your file archives between all locations. This gives you secure access to your data at any location.

# The right product data management for your success.
